Do everything conveniently ONLINE!

ShopLUX LTD is one of the only companies in Trinidad and Tobago that offers online shopping.

We have invested in a robust website where customers can experience the convenience of shopping at the comfort of their home, office or wherever. The user can pay for the items online and have the items ordered delivered straight to their specified location.

The product detail page shows information such as, the product image, description, price, quantity available and the item number. All the information

Yes our delivery and online store works!

All too common is the phrase in T&T that online will never work.

This has become a misconception because of many local companies and entrepreneurs quickly launching "online" stores, while failing to add enough and update content. This may be for a number of reasons..

Well long story short! You don't have to worry about that at ShopLUX.. We have been doing online in T&T for over 10 years now and our combined experience can carry us over 100 years.

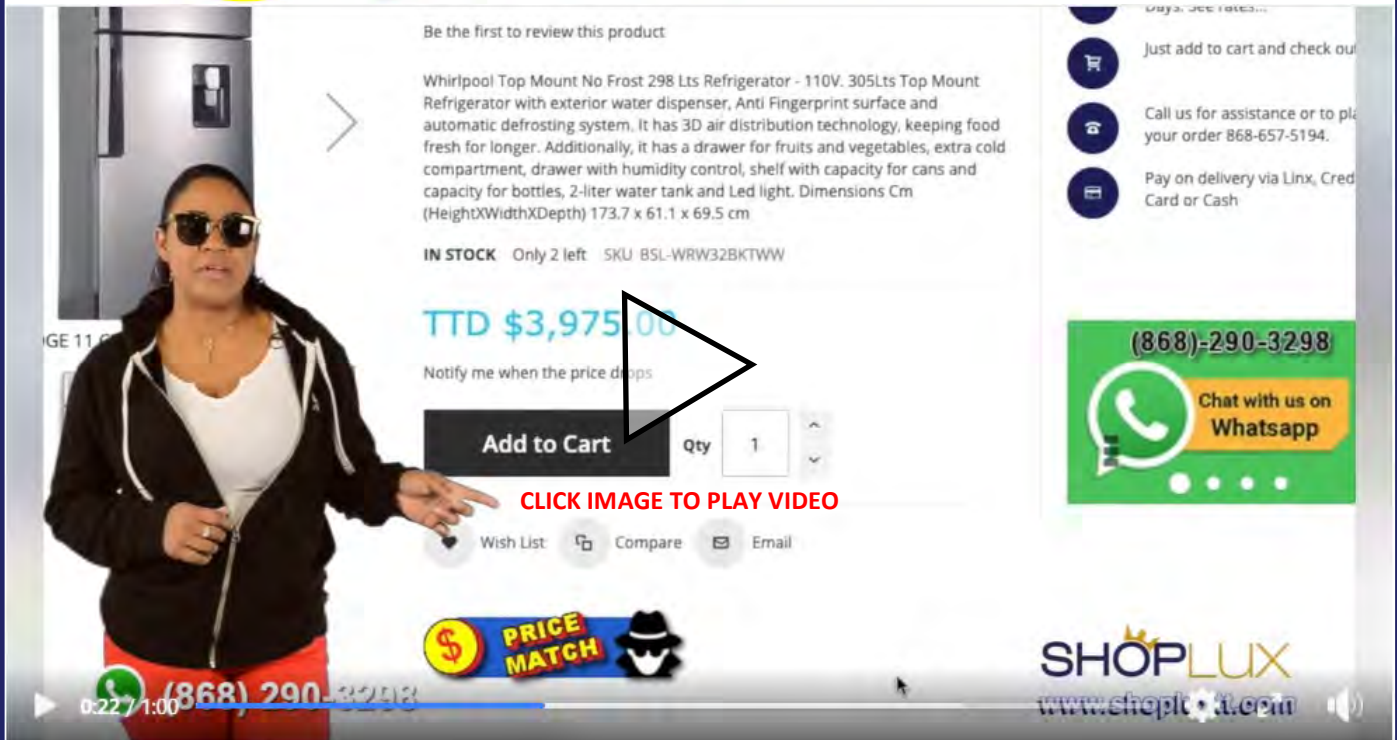

We saying it in BIG!
And we doh fraid nobody..

PRICE MATCH

Found a lower price?
Let us know...

Found a lower price on an identical item we carry?

On the product detail page we have added the “Price Match” button.

Simply click the button and fill out the information on the form.

Once your price match request is approved we will contact you with the new price we can offer for

What Qualifies for a price match?

Your product may be eligible for price matching if it is:

- **Identical to the competitor's product** The product must be a matching brand, model number and identical attributes to qualify. Sometimes manufactures change features of products and keep the same model number. This affects the price and would also be taken into consideration.
- **Immediately available at a qualifying local competitor** We would attempt to match local retail competitors once the item is locally available off their shelves. Sometimes a qualifying competitor will advertise a product in ads and on its website as having limited quantities in stock, on clearance, minor defects, cash back rebates etc. The item in these situation or situation similar would not be eligible. If the item is out of stock or the competitor has advertised as limited quantities of an item, it is not eligible for price matching. Likewise, if we have a product that is advertised as being limited in quantity it will not be eligible for price matching. (Our inventory status would displayed also gives the availability if not advertised as limited quantity)

Social media, online stores and some competitors poses challenges to properly evaluate and would not be a fair comparison.
